FOUNDATIONAL

CAPABILITIES

Assessment/Surveillance

Collect and review current health data and use to implement programs & services.

Community Partnerships

A priority in all foundational services. We actively look to join or start partnerships to expand our reach.

Equity

Use an equity lens in all services to make best effort to eliminate barriers.

Organizational Competencies

Train staff, update systems and adapt to current standards to ensure a competent workforce and organization.

Policy

Advocate, advise, and create policy that impacts the health of community members and public health staff.

Accountability

Use evidence-based practices and quality improvement tools to create a culture of quality.

Communications

Consistent messaging & education to community through a variety of platforms.

Emergency Preparedness

Plan, exercise, coordinate, partner and evaluate for emergency response situations.
